

Lakeland is an **innovative** university that works with students to turn their goals into reality.

Our flexible learning options give students the freedom to:

- Work
- Participate in athletics and clubs/organizations
- Create lifelong relationships

At Lakeland we value hard work, and our award-winning Cooperative Education program is providing a new way for students to earn a bachelor's degree.

**Cooperative education** allows you to earn academic credit for your work and prepare you for the real world while controlling the cost of college.

## **PSYCHOLOGY**

Psychology is a broad discipline that employs the methods of scientific inquiry as it observes, describes and explores the brain's role in emotion, thought and behavior. Students in the psychology program are called upon to think critically and creatively as they examine how organisms adapt to their surroundings through biological, social, emotional, perceptual and cognitive capacities. Students learn to become clear communicators, attentive listeners and dynamic and sensitive problem solvers. An undergraduate degree in psychology will prepare students for careers in human services as well as for graduate school programs in psychology, counseling, social work or law.

## **HIGHLIGHTS**

- The Psychology major promotes a scientific approach to the study of behavior and mental processes.
- Students majoring in psychology are called upon to think critically and creatively as they examine the ways
  in which organisms adapt to their environments through biological, social, emotional, perceptual and
  cognitive capacities.
- Psychology courses are offered as preparation for careers in a variety of professional settings or for graduate studies in psychology or related fields.
- The psychology major strives for the promotion of students' ability and desire to think critically about social systems and the problems that arise within them.
- Psychology provides excellent preparation for careers in the social sciences, law and religion. Positions
  available for students majoring in psychology include human resources consultant and human services
  careers (e.g. case management, group home worker, psychology assistant).
- The psychology program includes theory and methodology, as well as research and analysis.
